

Active Leeds

July 2026

Opening

Active Leeds presented the Accessercise App to the SEND Youth Council on the 23rd January 2026. There were 3 members of the Youth Council there.

Opportunity

The app and its features were shared with the young people.

Feedback was shared about the app, and discussion about the app and the council's attitudes towards exercise and other technology.

The feedback was passed onto the app developers and then shared with the creator of the app after the session.

Outcome

Based on feedback the following developments are being made:

Nutrition area

Accessercise are currently actively developing this area and using the council's feedback when doing so.

"Rate accessibility" – more questions / separate star ratings (accessibility, staff, equipment)

Accessercise are looking at incorporating separate star ratings and asked 'If you can share what questions they felt were missing, we can prioritise the most valuable ones.'

Night mode

Logged this formally as a product improvement and it is the product timeline.

Add Active Leeds low sensory sessions

Active Leeds and Accessercise are actively looking into how to make this work.

Safe warm-ups and cool-downs

Accessercise are filming these so they should hopefully be available soon.

Obligation
